

HARIS SOFYAN

SOFTWARE ENGINEER | CLOUD ENGINEER

Banyuwangi, East Java, Indonesia | +62 857-8416-1309 | haristiani243@gmail.com
linkedin.com/in/haris-sofyan | harissofyan.vercel.app

PROFESSIONAL SUMMARY

Software Engineer and Cloud Engineer with 4+ years of experience across full-stack development, backend engineering, data engineering, technical leadership, and IT support. Experienced in delivering production applications, real-time platforms, RESTful APIs, database integrations, and machine-learning-enabled solutions. Strong end-to-end ownership from requirements and architecture through testing, deployment, and maintenance.

CORE SKILLS

Software Engineering | Full-Stack Development | Backend Development | RESTful APIs | System Architecture | Real-Time Applications | Cloud Computing | Google Cloud | MySQL | PostgreSQL | MongoDB | Authentication and Authorization | Data Engineering | Data Preprocessing | Machine Learning Integration | Testing | Deployment | Production Maintenance | Technical Leadership | Stakeholder Collaboration | Troubleshooting

PROFESSIONAL EXPERIENCE

Kreasi Bali Sasmita Nusantara | Bali, Indonesia

Software Project Lead | Feb 2026 - Present

- Lead software projects across the full development lifecycle, including requirements analysis, technical planning, execution, deployment, and continuous improvement.
- Coordinate priorities, provide technical direction, monitor delivery progress, and align engineering solutions with business objectives.

Kreasi Bali Sasmita Nusantara | Bali, Indonesia

Software Engineer | Jan 2026 - Present

- Develop scalable full-stack solutions spanning user interfaces, backend services, APIs, databases, third-party integrations, secure authentication, and real-time functionality.
- Contribute to architecture, testing, deployment, performance optimization, and production maintenance.

Haris Dev | Banyuwangi, Indonesia

Freelance Software Engineer | Jan 2022 - Present

- Deliver end-to-end freelance projects across full-stack web development, custom applications, and machine learning.
- Own requirements analysis, system architecture, frontend and backend development, API and database integration, data preprocessing, model training and fine-tuning, testing, deployment, and maintenance.

Jupitr Agency | Indonesia

Software Engineer | Sep 2025 - Dec 2025

- Built and deployed a real-time project management platform inspired by ClickUp, supporting tasks, notifications, chat, project tracking, team collaboration, user roles, deadlines, priorities, workflow statuses, and synchronized activity.
- Managed architecture, database design, feature implementation, testing, production deployment, and maintenance.

STIKOM PGRI Banyuwangi | Banyuwangi, Indonesia

Assistant Lecturer | Jul 2025 - Dec 2025

- Supported classes and practical sessions in Algorithms and Data Structures, Relational Databases, and Non-Relational Databases; guided students and reviewed assignments.

STIKOM PGRI Banyuwangi | Banyuwangi, Indonesia

Software Engineer | Feb 2025 - Jun 2025

- Contributed to a company profile website, E-Kinerja staff performance system, EduMonitor student monitoring platform, and SIAKAD academic information system.

PROFESSIONAL EXPERIENCE - CONTINUED

PawangTech | East Java, Indonesia

Data Engineer | *Dec 2024 - Dec 2025*

- Cleaned, validated, transformed, and prepared datasets for machine learning; trained and fine-tuned models, evaluated performance, and documented data workflows.

PawangTech | East Java, Indonesia

Software Engineer | *Dec 2024 - Dec 2025*

- Developed full-stack applications, APIs, and database integrations; handled testing, deployment, and maintenance, and integrated machine learning models into selected solutions.

CV. Blambangan Dev | Banyuwangi, Indonesia

System Implementor | *Dec 2024 - Mar 2025*

- Implemented and integrated the Sijaka Wangi tax collection application with point-of-sale systems used by hotels, restaurants, and cafes.
- Managed installation, configuration, system testing, troubleshooting, user support, and accurate transaction data transmission.

PT. Mudapedia Digital Indonesia | East Java, Indonesia

Lead Software Engineer | *May 2024 - Nov 2024*

- Led the engineering team in delivering reliable, scalable software; coordinated tasks, reviewed code, provided technical guidance, and translated stakeholder requirements into technical implementations.

PT. Mudapedia Digital Indonesia | Banyuwangi, Indonesia

Backend Developer | *Nov 2023 - Nov 2024*

- Developed and maintained scalable backend systems, RESTful APIs, server-side business logic, and integrations with MySQL, PostgreSQL, MongoDB, and third-party services.
- Implemented secure authentication and authorization mechanisms.

Banyuwangi Regency Government | Kabat, Banyuwangi, Indonesia

Information Technology Technical Support | *Mar 2022 - Oct 2022*

- Provided technical support for office computers, software, networks, and peripherals; assisted staff with troubleshooting, system maintenance, and basic IT administration.

EDUCATION

STIKOM PGRI Banyuwangi

Bachelor of Informatics Engineering | Jun 2022 - Jun 2026

SMK Negeri 1 Banyuwangi

Computer and Informatics Engineering | Jul 2019 - Jul 2022

CERTIFICATIONS

- Google Cloud Fundamentals: Core Infrastructure
- Google: Implementing Cloud Load Balancing for Compute Engine

AWARDS

- 1st Place, National IT Mobile Programming - Indoneris, Amikom Purwokerto
- 1st Place, National Poster Design - Peksis, Amikom Purwokerto
- Grant Awardee, Jagoan Digital Banyuwangi Startup Program (2022)
- 3rd Place, LKS Cybersecurity - East Java Work Region 2
